

BIKE SHELTER REFURBISHMENT

Co-op Academy

Manchester

Project Overview

Co-op Academy reached out to Fix My Shelter to refurbish their existing cycle shelter by replacing ageing glazing panels. The project was undertaken to improve weather protection, safety and appearance while extending the lifespan of the existing shelter structure. All works were completed during school holidays, ensuring minimal disruption to pupils, staff and day-to-day school operations.

Before

THE RESULTS

- ✓ Improved weather protection for bicycles and users
- ✓ Refreshed appearance of the cycle shelter area
- ✓ Extended lifespan of the existing shelter structure
- ✓ Reduced future maintenance requirements
- ✓ Safe, clean environment for pupils and staff

After

CHALLENGE

- Existing glazing panels had become weathered and deteriorated over time
- Reduced weather protection for bicycles stored on site
- School required improvements without the cost of full replacement
- Need to improve protection for bicycles used by pupils and staff
- Work required careful scheduling to avoid disruption with the school environment

OUR SOLUTION

Fix My Shelter carried out a comprehensive refurbishment of the existing cycle shelter, replacing the ageing glazing panels to restore their appearance and performance. The project was carefully planned and completed during the school holidays, allowing the works to be carried out safely and efficiently while ensuring minimal disruption to pupils, staff and daily school activities.

CLIENT FEEDBACK

"Fix My Shelter delivered a professional service from start to finish. The team was responsive, easy to work with and completed the installation to a high standard. The new panels have made a significant improvement to the shelter, and we are delighted with the finished result."
