

BIKE SHELTER PANELS REPLACEMENT

Crystran Ltd

Poole

Project Overview

Crystran Ltd partnered with Fix My Shelter to replace all existing glazing panels on their on-site bike & smoking shelter. Over time, the original panels had become worn and less effective, reducing weather protection and the overall appearance of the shelter. The project focused on restoring functionality, improving durability, and enhancing the visual finish of the structure, ensuring a better experience for staff using the facility. All works were completed efficiently within a 3 hour time frame, with minimal disruption to business operations

Before

THE RESULTS

- ✓ Improved weather protection for bicycles and users
- ✓ Clear, modern appearance of glazing panels
- ✓ Enhanced durability and long-term performance
- ✓ Immediate visual improvement to the shelter area
- ✓ Minimal disruption to staff and daily operations

CHALLENGE

- Existing glazing panels had deteriorated over time
- Reduced protection from weather exposure
- Shelter appearance no longer aligned with site standards
- Work required to be completed quickly within a live business environment

OUR SOLUTION

Fix My Shelter carried out a full glazing panel replacement, removing all existing panels and installing durable, high-quality replacements.

The works were completed efficiently within half a day, ensuring minimal disruption while delivering a clean, professional finish

CLIENT FEEDBACK

From start to finish the team from Fix My Shelter were absolutely brilliant. I was kept well informed throughout the process, and the finished refurbishment looks amazing. I would highly recommend Fix My Shelter to do a refurbishment of a bike shelter to anybody, you really won't be disappointed!" - Dave Richards
